MENOMONIE --- The Dunn County Solid Waste Division recently welcomed Casey Pieschek as the new LTE Recycling Assistant. This summer Pieschek will be working closely with the Recycling Specialist, Amanda Haffele, on special event recycling, recycling assessments at convenience stores, restaurants, and apartment buildings. He will also help with the launch of the new plastic film and bag recycling program.

Pieschek is a senior studying Communications/Public Relations and Resource Management at the University of Wisconsin - Stevens Point. Inspired at a young age, Pieschek has always been interested in the environment, particularly environmental issues, such as recycling.

In college, Pieschek is an active member in many organizations and groups including the WWSP 90FM Promotions Team and the Cornerstone Press, a publishing and editing group. Besides school organizations, Pieschek is engaged in organized sports and also enjoys outdoor activities such as fishing and snowmobiling.

Pieschek is a native of Algoma, WI, a small town located on the shores of Lake Michigan. He is excited to gain more knowledge about the area and meet the local residents.

For more information regarding event recycling or questions about plastic film and bag recycling, please contact Casey at the Solid Waste Office at 715-232-2619 or email him at recyclinglte@co.dunn.wi.us.
