Heritage Memory Care Neighborhood is located in the city of Eau Claire, Wisconsin.

Our two 17-suite neighborhoods offer residents an uncomplicated design with home-like private accommodations. We provide warm, inviting common areas within a safe, secured environment. Our interior garden courtyard encourages relaxing on a bench or strolling amongst the beautiful flowers. Heritage Court is dedicated to:

**Nurturing the spirit**

**Nurturing the body, and**

**Engaging the mind**

of each resident while respecting their dignity and well-being.

**Caregivers Make all the Difference**

Entrusting the care of someone you love to strangers is perhaps the most difficult decision you will ever make. Needless to say, you want to be sure that the caregivers have training and compassion to respond to the special needs of your loved one. When hiring staff, we focus on qualities of compassion and caring, knowing that we can always teach skills and tasks. Heritage Court takes great care and time to screen all potential employees prior to hiring.

**Nurturing the Body**

**Medication Monitoring**

Monitoring of daily medication is of primary importance. Heritage Court offers a comprehensive program to ensure prescriptions are accurately dispensed according to the resident’s physician.

**Dining Programs**

Heritage Court offers dining programs based on each resident’s individual needs and stage of dementia. Dining programs are structured mealtime activities which meet each resident’s physical and psychosocial needs and encourage residents to reach their maximum level of independence.

**Health and Wellness Programs**

Our goal goes beyond simply providing assistance to our residents. Maintaining health and wellness is of primary importance. We try to enhance our resident’s overall wellness, enabling them to enjoy the best quality of life they possibly can. We do this by providing regular health assessments by our staff nurse and providing activities that encourage social interaction.

**Engaging the Mind**

**Activities as a Way of Life**

At Heritage Court, successful activity programming is not based on “outcome” but rather the “process” of honoring each resident’s skills. This philosophy ensures that the present moment is one filled with a meaningful connection.

In addition to traditional activity programming such as music, games and physical recreation, residents are also encouraged to participate in the daily life within the neighborhood.

During a visit to our neighborhood, you may find residents assisting with daily household chores such as setting the table for mealtime, folding laundry or gardening.

These activities stimulate and engage the resident’s remaining cognitive strengths. They provide opportunities for residents to remain in control of their environment which increases self-esteem and reduces behavioral issues.

The Admission Process...
We thoroughly assess each prospective resident prior to admission to ensure they are appropriate and compatible with our program. When admitted to Heritage Court, our Assessment Team, with the help of the resident's family, develops an individualized care plan tailored to the resident's strengths and needs. A "Life Story" is gathered at the time which includes information about accomplishments, disappointments, major events, important people, joys and losses. This information is then used to educate our caregivers prior to the resident's admission.

Come, relax in our courtyard, meet our staff, and experience the pride we take in giving care.
